

8th Annual EOH Technical Symposium
“Nanomaterials: Implications for
Environmental and Occupational Health”
March 7, 2013 California State University, Northridge

5 Reasons to Attend a Symposium on Nanomaterials

1. Nanotechnology is an important emerging industry with a projected annual market of nearly \$3 trillion by 2015. Polls show most Americans know little or nothing about nanotechnology.
2. Products containing nanomaterials are everywhere. Did you know they can be found in donuts, toothbrushes, food packaging, and other food related products? They also have widespread use in paints, artwork, clothing, cosmetics, sunscreen, pharmaceuticals, deodorants, automotive, aeronautic, fabric, wood, paper, plastic, rubber, paint and building industries, the wire & cable sector and manufacturers of household appliances and packaging.
3. Research is ongoing on hazards to living organisms and the environment. Hear the latest information from the National Institute of Occupational Safety and Health.
4. Presenters include a line-up of nationally recognized speakers encompassing the areas of environmental and occupational health, and regulatory requirements. A wide range of topics will be covered such as the manufacture and utility of nanomaterials, the health effects associated with exposures, risk assessment, exposure assessment and engineering controls.
5. 8 hours of CEU's at a price that can't be beat!

Pre-registration fees are \$75 for EOH Alumni Chapter Members and \$85 for non-members. Pre-registration includes complimentary parking and a buffet lunch. Registration at the door is \$100 and does not include parking (\$6) or lunch. Attendees must pre-register by March 1, 2013 to secure lunch and free parking. **Students may attend at no charge, but should register by March 1, 2013.** Students may also pay \$15 when they pre-register if they wish to participate in the buffet lunch. For complete program and registration information click on www.csun alumni.com/eohtechsym2013 . Our speakers include:

Antonio F. Machado, Ph.D., REHS; Associate Professor, Department of Environmental and Occupational Health, California State University, Northridge

Christopher Melnyk, M.S.; Vice President, Engineering, California Nanotechnologies, Cerritos

Arturo A. Keller, Ph.D.; Professor, Bren School of Environmental Science and Management, University of California, Santa Barbara

Nicholas Kioussis, Ph.D.; Professor, Department of Physics and Astronomy, California State University, Northridge

Andre Nel, M.D., Ph.D.; Director, Center for Environmental Implications of Nanotechnology (CEIN), University of California, Los Angeles

Laura Hodson, MSPH, CIH; National Institute of Occupational Safety and Health, Cincinnati, Ohio

Ross R. Veal, CIH; Industrial Hygiene Manager, Environmental Programs Division Manager, University of California, Los Angeles

Axel Zerrath, M.S., CIH; Senior Application Engineer, Nanotechnology, TSI, Inc., Shoreview, Minnesota
